Adan H Garcia

adan@adangarcia.com | (585) 362-6320 | Churchville, NY | adangarcia.com
LinkedIn: adangarcia2025

Objective

To obtain an internship or co-op in Mechanical Engineering. Available May through December 2027.

Education

Rochester Institute of Technology|*Bachelor's/Master's of Science in Mechanical Engineering* | August 2025 – May 2030 GPA: 3.45

Skills

CAD & Design: Onshape, Autodesk Fusion 360, Autodesk Inventor
Manufacturing & Fabrication: Manual Lathe, Mill, Drill Press, Bandsaw, Soldering, Electromechanical Troubleshooting
Programming & Software: Python, MATLAB, Git, GitHub, Arduino, HTML, GDScript
Hardware & Systems: Computer & Server Assembly, Linux, Proxmox, Docker
Data & Documentation: Microsoft Excel, Word, Google Workspace

Experience

Parts & Service Technician (Seasonal) | *Pettis Pools & Patio (Hilton, NY, On-site)* | May 2026 – August 2026

- Operated as a technical specialist, dedicating 40+ hours weekly to the hands-on repair and optimization of fluid and electromechanical systems.
- Diagnosed, serviced, and rebuilt pool pump motors and mechanical assemblies.
- Troubleshot complex plumbing, pressure, and filtration issues across pool and spa systems.
- Serviced and repaired mechatronic systems, including automated robotic pool vacuums.
- Performed comprehensive spa repairs covering electrical troubleshooting, plumbing, and physical tub restoration.
- Handled customer questions and provided technical support for multiple store locations.

Freelance Game Developer | *Fiverr (Remote)* | June 2024 – December 2025

- Managed end-to-end freelance game development cycles for a diverse international client base, balancing technical execution with active project management.
- Led technical consultations with clients to define project scope, translate abstract concepts into technical requirements, and deliver iterative updates.
- Wrote clean, scalable code to implement custom gameplay mechanics and resolve edge cases.

Engineering & Leadership Team Member | *Greater Rochester Robotics Team, GRR 340 FRC (Churchville, NY)* | October 2022 – May 2025

- Led and collaborated on engineering projects, mentoring new members on safety and design principles within the team.
- Coordinated with volunteer mentors to refine mechanical and control systems on an internationally recognized team.
- Developed leadership, communication, and project management skills in a fast-paced technical environment.

Projects on website

Chime Machine: Designed mechanical assemblies utilizing Onshape and programmed Arduino in C++ to automate physical chime strikes.
3D-Printed Wallet: Modeled an ergonomic, slim-profile mechanical wallet utilizing Fusion 360 and Onshape, focusing on manufacturing constraints
2024-2025 FRC Robot Intakes: Engineered and assembled robust robot intake mechanisms to optimize game piece acquisition during fast-paced competition.
